ABSTRACT

Formerly published as an irregular feature of New Zealand Libraries, these three annual bibliographies (1980, 1981, 1982) list bibliographical work in progress, as well as enumerative and subject bibliographies published in New Zealand from July 1977 to June 1982. It is noted that bibliographical work in progress is compiled from an annual questionnaire sent to New Zealand bibliographers and librarians, and that the list of bibliographies published is taken from, among other sources, the New Zealand National Bibliography and the Index to New Zealand Periodicals. A total of 970 bibliographic items are cited, under a maximum of 12 subject areas: (1) general bibliographies, special classes of material, and librarianship; (2) philosophy and religion; (3) social sciences; (4) biological and medical sciences; (5) physical and earth sciences; (6) agriculture, forestry, and fisheries; (7) engineering, domestic, and applied sciences; (8) the arts; (9) recreation and sport; (10) language and literature; (11) geography, history, and area studies; and (12) personal bibliography. Scope and progress notes are given for work in progress items. Each publication has an author index, and the 1981 edition also includes lists of newspaper indexes, and 80 working index and clippings files in New Zealand libraries. A subject index to these working files is provided. (ESR)

INTRODUCTION

With the 1980 issue this work has a new title, a new format, and a new method of publication. Formerly published as *Bibliographical Work in Progress*, it has appeared (not always annually) in the following issues of *New Zealand Libraries*:

Compiler	Issue			
T.H. Hill	Volume 25	number 3	April 1962	pages 71-77
T.H. Hill	26	4	May 1963	120-124
T.H. Hill	27	4	May 1964	83-87
R.F. Grover	28	9	October 1965	220-224
	29	6	July 1966	121-124
R.E. Carroll	30	4	August 1967	118-123
R.E. Carroll	31	4	August 1968	153-159
R.E. Carroll	34	6	December 1971	257-268
M.D. Coleman	35	6	December 1972	334-343
M.D. Coleman	36	7	December 1973	417-427
A.M. Broadbent	38	2	April 1975	112-121
M.C. Evans	39	1	February 1976	4-16
A.M. Broadbent	40	3-4	1977	91-102

The increasing length of the bibliography, together with the change to quarterly publication of *New Zealand Libraries*, has resulted in a move to separate publication; the change of title more nearly reflects its content.

The bibliography is divided into two sections, Bibliographical Work in Progress at June 1980, and Bibliographies Published Since July 1977. The first section is compiled from a questionnaire mailed to all bibliographers listed in *Bibliographical Work in Progress 1977* who have not since published, to all who completed forms for the 1978 issue which regrettably for a number of reasons could not be produced, and to all educational, government, medical, special and large public libraries in New Zealand. Not all replied, but our grateful thanks to those who did, and especially to the many librarians who forwarded the questionnaires to bibliographers within their respective institutions or otherwise provided assistance.

The second section is compiled from submissions from librarians and bibliographers, from entries in the *New Zealand National Bibliography* 1977-May 1980, the *Index to New Zealand Periodicals* 1977-1979 and library accessions lists, and from bibliographies received by the University of Waikato Library. A few titles published prior to July 1977 which have not been listed in earlier issues of *Bibliographical Work in Progress* have also been included. The form of entry for monographs is normally that of the *National Bibliography*. Items marked by an asterisk in this section are unpublished: most of these are New Zealand Library School bibliographies, copies of which may be borrowed from User Services, National Library of New Zealand.

Entries are arranged under broad subject headings, which it is hoped will be more useful than a strictly alphabetical arrangement. Each item is however listed once only, and since some items could fall under several headings, the user may need to scan several sections to locate bibliographies of interest.

This list is confined to enumerative and subject bibliographies. Textual bibliography, printing, publishing and book trade history are covered by other lists such as: W. and J.L. Kirsop. Bibliography in and about Australia, New Zealand and the South Pacific: a first checklist for the years 1969 to 1972. *Bibliographical Society of Australia and New Zealand. Bulletin* vol.1 no.5, 1972, p.88-138.

We should appreciate receiving notification of any errors in or omissions from this bibliography.

INTRODUCTION

This second issue of *Bibliographical Work in New Zealand* is divided into four sections. The first, Bibliographical Work in Progress at June 1981, is compiled from a questionnaire mailed to all bibliographers listed in *Bibliographical Work in New Zealand 1980* who have not since published, and to all educational, government, medical, special and large public libraries in New Zealand. Not all bibliographers to whom questionnaires were sent replied: since it is assumed that their work is still in progress, entries from the 1980 issue have been repeated in this issue, but marked with an asterisk to indicate that the details have not been re-confirmed.

The second section, Bibliographies Published Since June 1980, is compiled from submissions from librarians and bibliographers, from entries in the *New Zealand National Bibliography* June 1980-May 1981, the *Index to New Zealand Periodicals* 1980 - Part 1 1981 and library accessions lists, and from bibliographies received by the University of Waikato Library. A few titles published prior to June 1980 which have not been listed in earlier issues have also been included.

Entries in both these sections are arranged under broad subject headings. Each item is however listed once only, and since some items could fall under several headings, the user may need to scan several sections to locate bibliographies of interest.

The third section, Working Files in Libraries, lists files compiled by libraries which go beyond what is usually expected of library catalogues and which are unlikely to find any published form. The information compiled from questionnaires, is given in two parts: newspaper indexes, arranged by place of publication and then by title; and other working files, arranged by library. This section updates an earlier survey published in *New Zealand Libraries* vol.26 no.8, September 1963, p.205-215. It is intended to update the information and publish it in *Bibliographical Work in New Zealand* about every five years.

The fourth section consists of a Subject Index to the Working Files, and an Author Index to the Work in Progress and Bibliographies Published sections.

We are very grateful to all who replied, and especially to the many librarians who forwarded the questionnaires to bibliographers within their respective institutions or otherwise provided information and assistance. We should appreciate receiving notification of any errors in or omissions from this bibliography.

This third issue of *Bibliographical Work in New Zealand* is divided into two sections. The first, Bibliographical Work in Progress at June 1982, is compiled from a questionnaire mailed to all bibliographers listed in *Bibliographical Work in New Zealand 1980* and *1981* who have not since published, and to all educational, government, medical, special and large public libraries in New Zealand. Not all bibliographers to whom questionnaires were sent replied: since it is assumed that their work is still in progress, entries from the 1981 issue have been repeated in this issue, but marked with an asterisk to indicate that the details have not been re-confirmed. Entries from the 1980 issue have not, however, been re-listed unless an updated return has been received.

The second section, Bibliographies Published Since June 1981, is compiled from submissions from librarians and bibliographers, from entries in the *New Zealand National Bibliography* June 1981-May 1982, the *Index to New Zealand Periodicals* 1981 and library accessions lists, and from bibliographies received by the University of Waikato Library. A few titles published prior to June 1981 which have not been listed in earlier issues have also been included.

Entries in both these sections are arranged under broad subject headings. Each item is, however, listed once only, and since some items could fall under several headings, the user may need to scan several sections to locate bibliographies of interest.

We are very grateful to all who replied, and especially to the many librarians who forwarded the questionnaires to bibliographers within their respective institutions or otherwise provided information and assistance. Lorna Holland's help with the production of this work is also gratefully acknowledged.

We should appreciate receiving notification of any errors in or omissions from this bibliography.
